More than four years in the making, with over 3,000 days of filming in the field, **LIFE** will take students to every continent and every habitat.

Narrated by Oprah Winfrey, **LIFE** captures never-before-seen behaviors using the latest in state-of-the-art high-definition filming techniques. From strange creatures, such as the star-nosed mole that hunts underwater using bubbles to smell its prey, to grand spectacles, like millions of fruit bats darkening the Zambian sky, each episode makes classroom walls disappear as students immerse themselves in our spectacular world.
