

See the Difference Discovery High Resolution Media Server

Discovery is the Difference

It's perfectly clear. Discovery Education's unsurpassed video content, together with Dell™ PowerEdge™ servers, ignites students' curiosity and enhances the classroom experience.

Access full-screen, crystal-clear Discovery Education *streaming* content directly played from a local server installed within your WAN. 9,000

videos – including favorites from PLANET EARTH, Discovery ATLAS, PBS® and more – jump off the screen and make learning come alive.

Content stored in your network saves time with faster, more consistent video delivery. Installation is a breeze. See what all the buzz is about.

improve you educators' video experience.

Discovery High Resolution Media Server

Powered by Dell™ PowerEdge™ Servers

Locally Host All Video Content with a Discovery Media Server

Discovery Media Servers let schools access Discovery Education video content directly from their local server rather than from the Internet.

Available Services Include:

- > Discovery Education *streaming* Plus and Discovery Education *streaming*
- > Discovery Education Science
- > Discovery Education Health

Advantages of Locally Hosted Content on a Discovery Media Server

- > Use your LAN/WAN to deliver video content rather than the Internet.
- > Content server is kept up to date when new videos are released by the Discovery Education *streaming* Network Manager software. New videos are transferred via an overnight process.
